EMINENT ALUMNI

Government College Kasaragod has a rich history of distinguished and eminent alumni members who have made significant contributions to various fields, including politics, arts, academia, sports and more. They serve as a testament of the institution's commitment to nurturing talent, fostering excellence, and providing a platform for individuals to realize their full potential. These remarkable individuals serve as shining examples, inspiring current and future students to make a positive impact on society.

Few of our eminent alumni profiles are listed below:

The screenshot displays the official website of the Kerala Legislative Assembly. The header includes the assembly's name in English and Malayalam, along with a search bar and accessibility links. A navigation menu at the top lists various sections like Home, Business, Members, Secretariat, Archives, Committees, Resources, Parliamentary Functionaries, Historical Data since 1957, and RTI/Contact. The main content area is titled 'Sitting Members' and lists several members. The profile of N A Nellikkunnu is highlighted, showing his photo, name, and constituency (Kasaragod). The text 'The Hon'ble MLA of Kerala [15th Kla]' is also visible.

Article Talk

Read Edit View history Tools

From Wikipedia, the free encyclopedia

K. V. Tirumalesh (1940 – 30 January 2023) was an Indian poet, writer and critic in the [Kannada](#) and English languages, and a retired professor.^[1] For his collections of poems *Akshaya Kavya* in Kannada (2010), he was awarded the *Sahitya Akademi Award*.^[2]

Early life

Tirumalesh was born in 1940 in the village of [Karadka](#) in the [Madras Presidency](#) of [British India](#) (present-day [Kasaragod district](#), of the Indian [State of Kerala](#)).^[3] He held a master's degree in English literature and a doctorate degree in [linguistics](#). He taught at the [English and Foreign Languages University, Hyderabad](#).^[4]

Career

Tirumalesh's career as a writer began in the 1960s when he wrote the collection of poems *MukhavaaDagalu* (Masks, 1968) in the *Navya* style, the modernist school of writing in *Kannada literature*. His *Mahaprasthan* (1990) was said to be the result of his exploration of ways of transcending the constraints of modernism.^[5] It dealt with the theme of disillusionment after victory, with the mythological *heavenward journey of the Pandavas* as the setting.^[1]

Tirumalesh's collection of poems, *Akshaya Kavya* (2010), as described by him is an "epic fragment".^[6] He elaborated: "Akshaya Kavya imbibes this spirit in an extensive way . It is a long narrative sans story, sans didacticism, sans any aim, a sort of poetic sojourn with a lot of gaps. It is long and fragmentary at the same time: my models are Ezra Pound, William Carlos Williams and Charles Olson."^[7] The work won him the *Sahitya Akademi Award for Kannada* in 2015.^[8]

SATURDAY, 25 MAY 2013

Kasargod Chinna(Srinivas Rao S)

Stage and Film are two different aspects of performing arts but a refined stage artiste can be a better film actor or director. Over the years, we have seen many stalwarts contributing to field of acting as an art. The undivided Madras Presidency had Kasargod that went to Kerala but activities by Kannadigas settled in Kasargod are much more remarkable than those in Mangalore, though we remain as part of Karnataka.

We have one of those born and brought up in Kasargod, settled there and has been working a great deal in the field of stage and film in three prime languages of coastal Karnataka namely Kannada, Tulu and Konkani. His experiments in drama have won many awards and his achievements within a short span of life are unparalleled by many. In other words, true gold in the land of art and gold! He is none other than Sujeer Srinivas Rao popularly known as Kasargod Chinna. Mangalorean.com is proud to present Kasargod Chinna... Konkani Chinna

Brief Profile

Prof. Rajendra Pilankatta joined International Center for Genetic Engineering and Biotechnology (ICGEB), New Delhi as postdoc in 2005, after the completion of his PhD degree in Biochemistry in the area of Biochemical Toxicology from Osmania University, Hyderabad. At ICGEB, he got research training in the area of tetravalent vaccine development against dengue virus using adenovirus as a vaccine delivery vector under the mentorship of Prof. S. Swaminathan. During this period, he had an opportunity to involve in the dengue diagnostics development using NS1 protein. The vaccine research was well cited and helped to create a platform to develop tetravalent chimeric epitope against dengue virus. He joined as postdoc in Prof. G. Inesi lab at CPMCRI, San Francisco, USA and did studies on P-Type ATPase by delivering the gene by adenovirus vectors (2007-2010). Following this, he expanded his research in the area of antiviral drug discovery against dengue virus, as a senior postdoctoral fellow at Harvard Medical School, Boston, USA under the guidance of Dr. Priscilla

Collaboration Network

BIO

The research focus of Nirmala Mavila, PhD group focuses on understanding the mechanism of liver regeneration during acute and chronic injury. We are particularly interested in investigating the role of adult liver stem/progenitor cells and cross talk between WNT and other growth factor signaling in liver regeneration, cancer and biliary fibrosis. When liver is injured beyond its ability to regenerate itself, stem/progenitor cells known to expand. However, role of adult liver stem/progenitor cells in liver regeneration is still a controversy. An optimal balance between stem/progenitor cell activation, cell proliferation and its differentiation is essential for proper regeneration. Highly organized and locally-acting intercellular signals play an important role in this balance. Her previous work has been demonstrated that TGF beta mediated fibrotic differentiation of Prominint expressing progenitor cells is associated with biliary fibrosis of cholestatic liver disease, biliary atresia. Sustained and deregulated regenerative response without proper differentiation of progenitor cells could lead to diseases such as cancer and fibrosis. How liver regeneration is regulated at the cellular and molecular level in vivo during acute and chronic injury is far from clear and is the subject of studies in her lab.
