## 7.1: INSTITUTIONAL VALUES AND SOCIAL RESPONSIBILITIES

### Management of The Various Types Of Degradable And Nondegradable Waste

#### ‘ZERO WASTE’ - WASTE MANAGEMENT PROGRAMME BY NSS

The "Zero Waste Campaign" at Government College Kasaragod represents our comprehensive approach to the efficient management of various types of degradable and non-degradable waste materials. Through this initiative, we aim to minimise waste generation and promote responsible waste disposal practices.

#### Key Components of the Zero Waste Campaign:

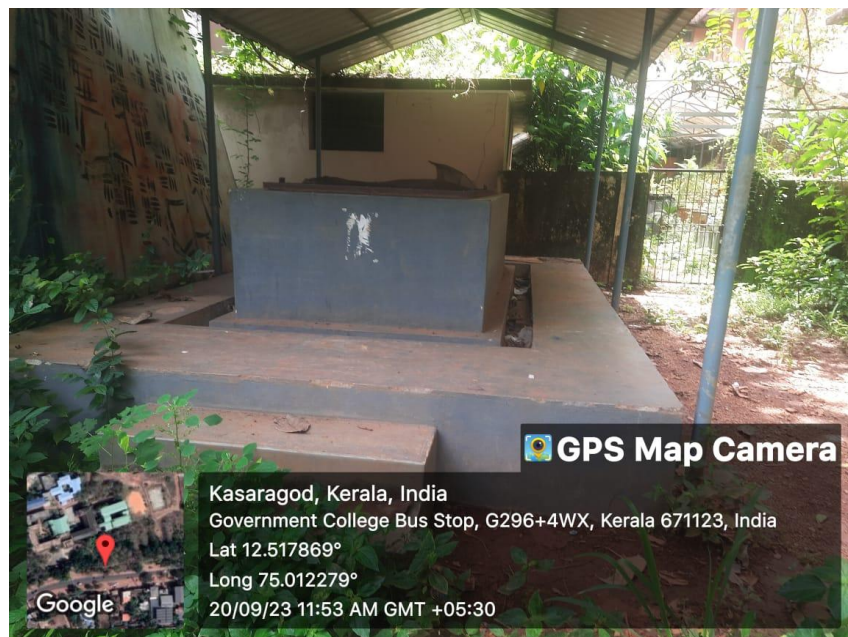

- 1. Waste Segregation:** We encourage the proper separation of waste into different categories, including biodegradable and non-biodegradable waste. This ensures that each type of waste is managed appropriately.
- 2. Recycling and Composting:** Non-degradable waste materials such as plastics, glass, and metals are directed towards recycling facilities, reducing their environmental impact. Biodegradable waste, on the other hand, is utilised for composting, turning it into valuable organic fertiliser for our gardens.
- 3. Reducing Single-Use Plastics:** As part of the campaign, we actively discourage the use of single-use plastics on campus. Reusable alternatives and eco-friendly materials are promoted to minimise plastic waste.
- 4. Awareness and Education:** We conduct awareness programs, workshops, and seminars to educate students, faculty, and staff about the importance of waste reduction and responsible disposal. These initiatives aim to foster a culture of sustainability within our college community.
- 5. Waste Audits:** Periodic waste audits are conducted to assess our waste management practices and identify areas for improvement. Data collected through these audits informs our strategies for waste reduction.
