5.2 STUDENT PROGRESSION

5.2.1 Percentage of placement of outgoing students and students progressing to higher education during the last five years

Queries during DVV: HEI To pl upload Appointment letters of students placed and and Admission cards/ID proof of students progressed to higher degree for years 2022-23, 2019-20 and 2018-19

Responses to Queries (DVV) Metric ID - 5.2.1

1. After conducting a thorough review and revision of the list of students who fall into these categories, we have observed a positive change. The number of students in both categories has increased over these years.
2. As required during the Data Verification and Validation (DVV) process, we have now provided the necessary admission cards and ID proofs for the students who have progressed to higher degree programs during the specified years (2022-23, 2019-20, and 2018-19).
3. We would like to bring to your attention the data submitted under 5.2.1.2 (Number of outgoing students year-wise during the last five years). Regrettably, an error occurred in our initial entry, where we mistakenly recorded five hundred students for each year. In reality, there are deviations from the data we provided.
4. To rectify this, we are submitting a revised input for 5.2.1.2 in the form of an Excel spreadsheet. We kindly request that our updated entry be considered for the calculation of this metric.
5. These documents have been included to ensure the accuracy and completeness of our submission, and we appreciate your understanding and support in this matter.
